Re: Well MW-23, South Cavalcade Site

Dear Ms. Craig:

On February 16, 1988, I informed you that well MW-23, located on the Crozier-Nelson property, did not need to be resampled.

I understand that the representatives from Crozier-Nelson now wish to have the well removed. You may remove the well now if you wish. In doing so, you must close the well in a way which prevents the well from being a conduit for vertical migration of ground water.

Please inform me as to the methods you will use to close the well.

Sincerely yours,

James F. Pendergast, P.E.
Remedial Project Manager
